

Goal: create a recommendation system for Netflix movies/tv shows using text descriptions of Netflix movies/shows

```
rec("Grey's Anatomy")
```

```
5459          Secret City
1391          Cinta Iris
94           28 Days
644          Ayana
2909    I Don't Know How She Does It
3598          Lenox Hill
3743          Love Aaj Kal
6334          The English Game
5083          Rakkhosh
5781          Staged Killer
Name: title, dtype: object
```

Above you can see a preview of a baseline recommendation engine. It isn't particularly accurate, so that is where I will direct my focus for the remainder of the project. If there is time, I would like to create an interface for users to interact with.

Below, you can also see a wordcloud I was able to create:
